

4.3 Graphs of tangent and Cotangent

Wednesday, February 26, 2020

10:28 AM

$$y = \tan x = \frac{\sin x}{\cos x}$$

$$\cos x = 0 \text{ when } x = \frac{\pi}{2} + K \cdot \pi$$

$\tan x$ is undefined when $x = \frac{\pi}{2} + K \cdot \pi$

Graph of $\tan x$ has vertical asymptotes when $x = \frac{\pi}{2} + K \cdot \pi$.

1 - basic cycle: Start at $-\frac{\pi}{2}$, ends at $\frac{\pi}{2}$.

x	y = tan x
$-\frac{\pi}{2}$	undefined \rightarrow V. A.
$-\frac{\pi}{4}$	-1
0	0
$\frac{\pi}{4}$	1
$\frac{\pi}{2}$	undefined \rightarrow V. A.

$$y = \cot x = \frac{\cos x}{\sin x}$$

$\sin x = 0$ when $x = k \cdot \pi$

$\cot x$ is undefined when $x = k \cdot \pi$

Graph of $\cot x$ has V.A. when $x = k \cdot \pi$.

1 basic cycle of \cot : starts at 0 ends at π .

x	$y = \cot x$
0	undefined \rightarrow V.A.
$\frac{\pi}{4}$	1
$\frac{\pi}{2}$	0
$\frac{3\pi}{4}$	-1
π	undefined \rightarrow V.A.
